PROFILE SUMMARY

Data Science and Python developer with experience in data analysis, machine learning, and statistical modeling. Proficient in Python, Pandas, NumPy, Scikit-learn, data visualization, and exploratory data analysis (EDA), with hands-on experience building data-driven applications and analytical dashboards.

EDUCATION

Jagran Lakecity University

Bachelor of Computer Applications (BCA), Honors in Data Science (CGPA: 7.2)

*Bhopal, MP
July 2023 - July 2026*

Relevant Coursework: Data Structures, Algorithms, OOP, Web Development, UX Foundations

St. Xavier's. Sr. Sec. Co-Ed. School, Bhopal

Bhopal, MP

Secondary education (Class 10th)-62.4% and Senior secondary education (Class 12th) - 55.6% score

PROFESSIONAL EXPERIENCE

Design Team Lead, LakeCity Hack 2025

- Led a team of 6 designers to deliver all event branding materials.
- Designed 30+ promotional assets across social media & print.

Design Head, Placement & Industry Interaction Club

- Created visual materials for workshops, seminars, and placement drives.
- Maintained design consistency across 20+ event campaigns.

Web Developer | 2024 - Present

- Developed responsive websites using HTML, CSS, and JavaScript.
- Improved UI/UX with clean layouts and interactive elements.

SKILLS:

Technical Skills: HTML, CSS, JavaScript, Python, C, C++, Pandas, NumPy, Scikit-learn, Chart.js

Design Skills: UI/UX Design, Prototyping, Wireframing, Visual Design, Branding, Layout Design

Tools: Figma, Canva, VS Code, Git, Streamlit

PROJECTS

Fake Job Detection System

(Python, Scikit-learn, TF-IDF, Random Forest, GridSearchCV, Streamlit)

- Built an ML model to detect fake job postings in an imbalanced dataset (~4.8% fraud).
- Engineered preprocessing pipeline using TF-IDF & ColumnTransformer.
- Tuned Random Forest model (GridSearchCV), achieving F1-Score: 0.6397.
- Deployed a Streamlit dashboard for real-time, color-coded predictions.

Financial Tracker Web App

(HTML5, CSS3, JavaScript, Chart.js)

- Developed an offline personal finance tracker with localStorage support.
- Implemented interactive charts for spending insights using Chart.js.
- Designed a clean, responsive UI for better usability.

Visual Branding – LakeCity Hack 2025

Figma, Adobe Illustrator

- Designed complete branding package including logo, posters & banners.
- Improved event visibility with consistent and modern design aesthetics.

ACHIEVEMENTS :

- Grew a social media page to 25,000+ followers through consistent content and branding.
- Led the complete visual branding for LakeCity Hack 2025, ensuring on-time delivery of all promotional materials.
- Participated in an inter-university Non-Code Hackathon, contributing to idea development and team coordination.
- Designed posters, banners, and digital assets for multiple university events, improving event visibility and engagement.
